

TOOTH EXTRACTION GUIDE

Everything You Need to Know to Make an
Educated Decision on Your Tooth Extraction

Welcome and Congratulations!

Dear Friend,

My name is **Dr. Oleg Klempner**, and right off the bat, I want to congratulate you on making the wise decision that'll help change your life! By requesting a copy of our Tooth Extraction Guide.

My ultimate goal is simple: to give patients smiles that they love. Why? Because in my years of practice, I've found that there's almost nothing that can make as big a difference in your health, self-confidence, and overall quality of life as your smile.

Everything else can be working like clockwork – job situation, family, friends and relationships. But if you can't experience the simple act of savoring the foods you love most or if you're embarrassed to smile or even engage in conversation because of your teeth.

Then no matter how great everything else is going, the real joy you desire long for is missing.

I'm here to tell you that you don't have to settle for that kind of life any longer. I know this for a fact because I have seen countless individuals who used to suffer teeth and jaw pain. No longer do they live with pain in their mouth - now they are eating and enjoying the food just like the old days.

I've seen patients walk in my doors seemingly ashamed to smile, full of fear and anxiety and later walk out those same doors glowing with a lovely smile as radiant as the sun.

Thanks to the miracles of modern medicine and technology it's now not only possible, it's far more achievable than you probably have ever imagined.

Whether you're reading this guide for yourself or for a loved one, you're in the right place. We've designed this to provide you with all the necessary information you need to make an educated decision regarding what is best for overall health and happiness.

With all that said, let's get started!

I went into their office with a dental disaster. I had missing teeth and other dental problems since childhood that were never adequately dealt with, and then had a partial bridge that had been in way, way too long and was causing serious problems, in addition to years of grinding that hadn't been dealt with because of the bridge. After the initial consult I almost had a heart attack when I realized the level of work that needed to be done, but that's the breaks. The staff at the office were just fantastic. They walked me through a lot of questions and a plan for a long-term fix of my mouth. Dr. Klempner was the kindest and most thoughtful dentist I've ever visited, and the other direct staff were similar to interact with. I was pretty terrified at various points, but after about 5 months of appointments (yup it was that bad, and they were each really concrete and clearly-intentioned appointments) I walked out of the office with the nicest smile I've had literally my entire life and plan to continue going there for annual check-ups etc etc.

Dr. Klempner took the time to clearly explain my treatment plan and what I needed to do on my end to prevent further issues, something none of my previous dentists had ever done. He answers all questions and is very upfront about what you should expect.

The office is also immaculately clean, with state of the art equipment and friendly staff. I used to dread going to the dentist but they make it a little more manageable. 5/5 stars would recommend.

I went here for my initial visit and cleaning. Their office is conveniently located close to subway stations. The office is very clean and the staff is very friendly and professional. Everything went very smoothly all throughout. I didn't have to sit and wait. Dr. Klempner was very informative and had a way of explaining things that can be easily understood. Overall, it was a great experience. Very recommended!

Everyone also is very intelligent and knowledgeable which was so nice because I had a few questions that were answered! :)

In fact, it is actually the most common dental procedure in the United States.

Top 6 Reasons For Tooth Extraction

1.

TOOTH PAIN

While a toothache is not always severe enough to call for an extraction, severe tooth pain can signal the need for a closer look.

2.

SEVERE TOOTH DECAY

When tooth decay is severe enough, it might be time to discuss your options with a dentist so that you don't become sick with an infection.

3.

TOOTH TRAUMA

When tooth trauma is extensive, an experienced dentist may advise that a tooth extraction might be a better option than attempting to repair the tooth.

4.

OVERCROWDING

Sometimes when overcrowding of the teeth is very severe, it may be prudent to remove one of the teeth to make space in the mouth for the rest of the teeth to grow properly.

5.

IMPACTION

When a tooth cannot erupt properly, that is called an impaction. If an impacted tooth is not removed, it can cause many dental complications.

6.

PERIODONTAL DISEASE

When diseases of the gums become advanced, it is sometimes wise to proactively remove the teeth rather than waiting for them to fall out on their own.

DOES HAVING A TOOTH EXTRACTED SOUND SCARY?

Don't worry, we've been taking care of people for a very long time and there isn't anything you can show us that we probably haven't seen before.

I moved to NY in August and haven't been to the dentist in awhile. With the cleaning, you can watch Netflix or whatever you choose during. Then, I did x-rays and a digital 3D model of my teeth was done - iTero it's called. The woman who cleaned my teeth was lovely and compassionate asking how I was liking NY etc. I saw Alec who was so kind and gave me great advice on my overgrown top tooth. It was sound and reasonable. He recommended the option best for long-term. I'm so grateful for their service. I intend to continue as a patient!!

Other notes: it is a beautiful office with top technology. Everyone is attentive, professional, and welcoming!
